Handwashing Investigation

We are trying to figure out what type of handwashing will get rid of the virus on our hands. So, we are going to try washing our hands a couple of different ways to see what works best.

Part 1. What will you use to make your hands oily, since the virus is oily?

--

Part 2. What will you use to make your hands dirty?

Make sure this is something powdery that you can see on your hands.

--

Part 3. Get your hands oily and dirty. Then, wash your hands for a few seconds with just water.

Draw or take a picture of what your hands looked like after this washing.

--

Describe in words or pictures what you did to wash your hands.

--

Part 4. Wash your hands as best you can to remove as much of the powder and oil as possible.

Draw or take a picture of what your hands looked like after this washing.

Describe in words or pictures what you did to wash your hands.
