

Patient A

Demographic data		Today's date: May 20
Patient name: [REDACTED]		
Age: 36	Height: 5'6	Weight: 145 lbs
Biological sex: F	Gender: X	Race/ethnicity: Non Hispanic White
Vital signs		
Temperature: 96°F	Heart rate: 75 BPM	Blood pressure: 120/80 mmHg
O ₂ saturation: 99%		
Medical history		
allergic to latex non smoker active 5 days a week		
Symptoms		
none		
Summary/notes		
Patient went to a social gathering May 10 and someone there has since tested positive. Patient works from home.		
Diagnosis/treatment		
COVID-19 test administered, results: positive Patient released		

Patient B

Demographic data		Today's date: May 16
Patient name: [REDACTED]		
Age: 35	Height: 6'2	Weight :185 lbs
Biological sex: M	Gender: M	Race/ethnicity: Black/African American
Vital Signs		
Temperature: 101°F	Heart rate:65 BPM	Blood pressure:125/75 mmHg
O ₂ saturation: 94%		
Medical History		
non smoker no known allergies ADHD family history of ovarian cancer (maternal) active 5 days a week		
Symptoms		
Symptoms onset: May 14 headache fever cough		
Summary/Notes		
Patient attended a social gathering on May 10. Patient is a lawyer and visited a client in jail on May 13.		
Diagnosis/Treatment		
COVID-19 test administered, results: positive		

Patient C

Demographic data		Today's date: May 15
Patient name: ██████████		
Age: 32	Height: 5'10	Weight: 155 lbs
Biological sex: M	Gender: M	Race/ethnicity: Hispanic/Latinx
Vital Signs		
Temperature: 99°F	Heart rate: 68	Blood pressure: 120/80 mmHg
O ₂ saturation: 96%		
Medical history		
non smoker penicillin allergy family history of hypertension sedentary		
Symptoms		
Symptoms onset: May 9 fatigue fever cough body aches		
Summary/notes		
Patient began feeling fatigued on May 9. Patient attended a social gathering on May 10. Patient took public transportation on May 12, 13 and 15. Patient took acetaminophen for fever and body aches.		
Diagnosis/Treatment		
COVID-19 test administered, Results: positive		

Patient J

Demographic data		Today's date: May 20
Patient name: ██████████		
Age: 70	Height: 5'3	Weight: 160 lbs
Biological sex: F	Gender: F	Race/ethnicity: White Non Hispanic
Vital signs		
Temperature: 102°F	Heart rate: 90 BPM	Blood pressure: 138/90 mmHg
O ₂ saturation: 90%		
Medical history		
history of smoking and high blood pressure sedentary lifestyle hysterectomy 20 years ago		
Symptoms		
Symptoms onset: May 17 fever difficulty breathing chest pain		
Summary/notes		
Patient first noticed chest pain and shortness of breath. Patient lives with a daughter and son-in-law. Patient's son-in-law tested positive for COVID-19.		
Diagnosis/treatment		
COVID-19 test administered, results: positive Admitted to hospital, put on O ₂		

Patient G

Demographic data		Today's date: May 24
Patient name: [REDACTED]		
Age: 23	Height: 5'7	Weight: 130 lbs
Biological sex: M	Gender: M	Race/ethnicity: Native American/Alaskan Native
Vital signs		
Temperature: 100.8 °F	Heart rate: 70BPM	Blood pressure: 132/80 mmHg
O ₂ saturation: 98%		
Medical history		
asthma no known allergies family history of pancreatic cancer active 3 times a week		
Symptoms		
Symptoms onset: May 21 mild cough fatigue shortness of breath		
Summary/notes		
Patient rode public transportation on May 15. Patient works at a bank in IT. Patient used an albuterol inhaler (for asthma) to help with shortness of breath.		
Diagnosis/treatment		
COVID-19 test administered, results: positive Patient released		

Patient E

Demographic data		Today's date: May 22
Patient Name: [REDACTED]		
Age: 34	Height: 5'4	Weight: 120 lbs
Biological sex: F	Gender: F	Race/ethnicity: Hispanic/Latinx
Vital signs		
Temperature: 97.5 °F	Heart rate: 64 BPM	Blood pressure: 120/85 mmHg
O ₂ saturation: 99%		
Medical history		
T-cell lymphoma at age 13, underwent chemotherapy, in remission		
Symptoms		
Symptoms onset: May 14 loss of taste and smell fatigue tightness in chest headache		
Summary/notes		
Patient was in contact with an individual with a confirmed case of COVID-19. Patient attended a social gathering with an individual with a confirmed case. Patient lives alone. Patient works from home.		
Diagnosis/treatment		
COVID-19 test administered, results: positive acetaminophen for headache, patient released		

Patient D

Demographic Data		Today's Date: May 19
Patient Name: [REDACTED]		
Age: 33	Height: 6'1	Weight: 150 lbs
Biological Sex: F	Gender: F	Race/Ethnicity: Black/African American
Vital Signs		
Temperature: 101 °F	Heart Rate: 85 BPM	Blood Pressure: 125/80 mmHg
O ₂ saturation: 98%		
Medical History		
Child birth 6 years ago No known allergies		
Symptoms		
Symptom Onset May 14 Fever Fatigue Body Aches Headache		
Summary/Notes		
Patient attended a social gathering with an individual with a confirmed case. Patient lives with a partner and child.		
Diagnosis/Treatment		
COVID-19 test administered, Results: positive acetaminophen for fever and aches, patient released		

Patient L

Demographic data		Today's date: May 19
Patient name: [REDACTED]		
Age: 6	Height: 3'8	Weight: 50 lbs
Biological sex: F	Gender: F	Race/ethnicity: Two or more races
Vital signs		
Temperature: 103 °F	Heart rate: 90 BPM	Blood pressure: 110/65 mmHg
O ₂ saturation: 92%		
Medical History		
no known allergies broken ulna age 4		
Symptoms		
Symptoms onset: May 16 fever runny nose cough fatigue muscle aches vomiting diarrhea dehydration		
Summary/notes		
Patient's mother also tested for COVID-19. Patient lives with parents.		
Diagnosis/treatment		
COVID-19 test administered, results: positive acetaminophen for fever and aches, recommended electrolytes for dehydration, patient released		

Patient F

Demographic data		Today's date: May 25
Patient name: [REDACTED]		
Age: 41	Height: 5'2	Weight: 100 lbs
Biological sex: F	Gender: F	Race/ethnicity: Korean American
Vital signs		
Temperature: 102 °F	Heart rate: 85 BPM	Blood pressure: 120/80 mmHg
O ₂ saturation: 99%		
Medical history		
type I diabetes active lifestyle non smoker		
Symptoms		
Symptoms onset: May 24 muscle aches vomiting diarrhea fatigue		
Summary/notes		
Patient works in a grocery store. Patient unable to keep solid foods down. Patient lives with a partner and elderly father.		
Diagnosis/treatment		
COVID-19 test administered, results: positive acetaminophen for fever and aches, recommended electrolytes for dehydration		

Patient K

Demographic data		Today's date: May 18
Patient name: ██████████		
Age: 25	Height: 5'10	Weight: 185 lbs
Biological sex: M	Gender: M	Race/ethnicity: White Non Hispanic
Vital signs		
Temperature: 98.5 °F	Heart rate: 85 BPM	Blood pressure: 130:85 mmHg
O ₂ saturation: 94%		
Medical history		
appendectomy age 10 non smoker treatment for anxiety and depression		
Symptoms		
Symptoms onset: May 16 fever runny nose cough fatigue muscle aches		
Summary/notes		
Patient is incarcerated. Patient met with a lawyer, who has since tested positive, on May 13.		
Diagnosis/treatment		
COVID-19 test administered, results: positive acetaminophen for fever and aches		

Patient H

Demographic data		Today's date: May 23
Patient name: ██████████		
Age: 55	Height: 6'0	Weight: 170 lbs
Biological sex: M	Gender: M	Race/ethnicity: White Non Hispanic
Vital signs		
Temperature: 100.7 °F	Heart rate: 65 BPM	Blood pressure: 130/90 mmHg
O ₂ saturation: 97%
