

1.

**How the COVID-19 vaccine works:**

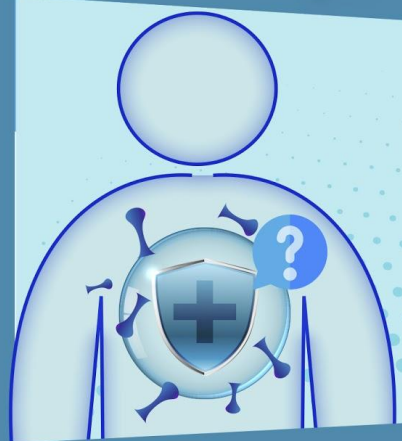

You get a shot.

**THE SPIKE!**

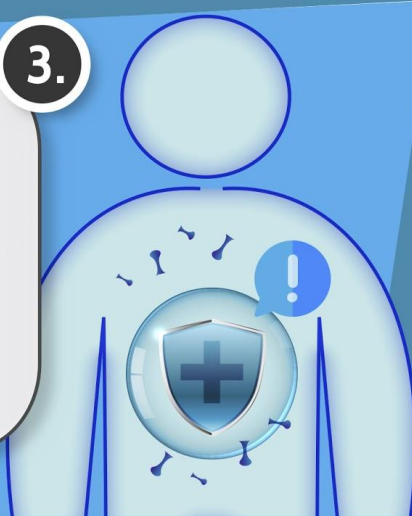

2.

Your body notices something different. It is like parts of the virus.

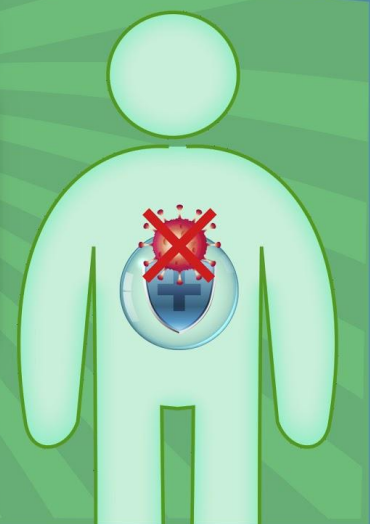

3.

Your body fights against the parts! You might feel a little sick while your body is fighting. You are not sick with COVID-19.

5.

Now you won't get sick from the coronavirus. Your body had practice fighting parts like it.

4.

Your body will remember how to fight those parts.
